

SPEED STRUCTURES

innovative • adaptable • modular

High Quality Structures

Whether you want temporary structures for an event or simply require extra space, we can accommodate your specific needs.

Every one of our clients is different and that's why we tailor our products and services to meet your individual needs. We can build you the perfect semi-permanent structure whether you want to create an impressive event location with a restaurant and a VIP area, or you require a temporary sport hall, showroom or warehouse.

Who Is Speed Structures

Speed Structures is and has been Africa's premier marquee structure manufacturer for the past twenty years. All Speed Structures are designed and fabricated in Africa for African conditions from the finest possible raw materials and components sourced worldwide.

Speed Structures allows you to build your business while using our structures. Speed Structures provides you, our customer, with world leading temporary and semi-permanent structural aluminium frame marquee structure solutions. From basic PVC clad storage marquees to the most elaborate glass sided events marquees.

What Is A Speed Structure

A Speed Structure is the best solution to your temporary or semi-permanent structure problem.

At the heart of a Speed Structure is a structural aluminum frame with various cladding options ranging from double PVC coated fabric to glass panels.
